

Born to be Wild 3D

Large Format IMAX® Film (2011)

Born to be Wild 3D is an inspiring story of love, dedication, and the remarkable bond between humans and animals. This film documents orphaned wild orangutans and elephants and the extraordinary people who rescue and raise them—saving endangered species one life at a time.

Stunningly captured in IMAX 3D, *Born to be Wild 3D* is a heartwarming adventure transporting moviegoers into the lush rain forests of Borneo with world-renowned primatologist Dr. Birute Galdikas. A parallel story takes viewers across the rugged Kenyan savannah with celebrated elephant authority Dame Daphne Sheldrick. The narrative follows both of these famous scientists as they and their teams rescue, rehabilitate and return these incredible animals to the wild.

Narrated by Academy-Award® winner Morgan Freeman. *Born to be Wild 3D* is directed by Science North's David Lickley and written and produced by Drew Fellman.

Mysteries of the Great Lakes

Large Format IMAX® Film (2008)

Mysteries of the Great Lakes is a timely exploration into the health of the Lakes. It encourages an increasing awareness of the importance of this freshwater resource to all of North America.

Mysteries of the Great Lakes highlights the need for preservation and conservation, and showcases the amazing geography, ecology, science, and history of the Great Lakes region, the world's largest fresh water system, on the only screen big enough to do the story justice.
