

Handout

1. Draw where you placed the fulcrum and weight on your lever for each trial. The fulcrum is what the lever rests and pivots on, like the middle of a sea-saw.

2. Which trial required the least amount of work?

3. Write or draw an example of a lever you have seen or used before.

4. Was it easier to lift the weight with or without the pulley?

5. Write or draw an example of a pulley you have seen before.
