

Water Forces!

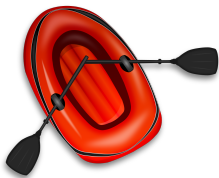

Grade 3: Forces Causing Movement

Fill in the blanks to complete the sentences using the word bank below.

wind	electricity	Water	friction
------	-------------	-------	----------

- _____ and _____ are two forces in nature that are very good at causing things to move, change speed, or change direction.
- The surface of water has less _____ than the surface of the ground, allowing us to glide things over water with ease.
- We can use the forces of water or wind to generate _____; we can use this to power things like lights and machines.

Look at the following pictures, and write **Water** if the driving force is water, or **Wind** if the driving force is wind:

In the space below, draw 3 different ways you use water in your everyday life:
